

## iPad Instructions – Preference Assessment Cheat Sheet

1. Hold up two items and allow the child to select one. The child should consume the item.

2. Do several of these presentations until each item has been presented 5 times in different combinations.

3. Those items that are selected 80% of the time will be used for training.
4. In the end we want to identify about 4-5 items that are the most motivating.
